BRCC Catalog (2016-2017)

The respiratory system (also respiratory apparatus, ventilatory system) is a biological system consisting of specific organs and structures used for gas exchange in animals and plants. The anatomy and physiology that make this happen varies greatly, depending on the size of the organism, the environment in which it lives and its evolutionary history.

Respiratory system - Wikipedia

Biological organization is the hierarchy of complex biological structures and systems that define life using a reductionistic approach. The traditional hierarchy, as detailed below, extends from atoms to biospheres. The higher levels of this scheme are often referred to as an ecological organization concept, or as the field,

hierarchical ecology.. Each level in the hierarchy represents an ...

Biological organisation - Wikipedia

This text makes the principles and theories of fitness and personal training accessible for all readers, helping them understand how the body works, how it responds to exercise, and how to create exercise programs that help clients accomplish their training goals.
