The second stage of information processing is the working or short-term memory. This stage is often viewed as active or conscious memory because it is the part of memory that is being actively processed while new information is being taken in. Short-term memory has a very limited capacity and unrehearsed information will begin

Information Processing and Memory: Theory and Applications

memories and myths encoded with meanings which can be read and interpreted. Simon Schama (1995, pp.6/7) in Landscape and Memory contends that: Before it can ever be the repose for the senses, landscape is the work of the mind. Its scenery is built up as much from strata of memory as from layers of rock.

Landscape and Memory: cultural landscapes, intangible

Parvati Raghuram, Ajaya Kumar Sahoo, Brij Maharaj and Dave Sangha, editors of this volume, focus on â€˜contexts, memories and representationsâ€™. They contend that â€˜reading the diaspora is most politically productive when embedded in the reality of its production, circulation and appropriationâ€™.
