Penile agenesis is a birth defect in humans, occurring about once in 5â€“6 million male births, in which a male child is born without a penis. A partner condition is testicular or gonadal agenesis. This is when a male child is born without gonads and consequently develops no testes. Penile agenesis occurs often as a consequence of Testicular agenesis, but the reverse is never the case.

In mythology, folklore and speculative fiction, shapeshifting is the ability of a being or creature to transform its physical form or shape. This is usually achieved through an inherent ability of a mythological creature, divine intervention or the use of magic. The idea of shapeshifting is present in the oldest forms of totemism and shamanism, as well as the oldest extant literature and epic ...
