Occupational therapy (OT) is the use of assessment and intervention to develop, recover, or maintain the meaningful activities, or occupations, of individuals, groups, or communities. It is an allied health profession performed by occupational therapists and Occupational Therapy Assistants. OTs often work with people with mental health problems, disabilities, injuries, or impairments.

Evidence of an association between neighbourhood greenspace and physical activity is equivocal. The current analysis finds a positive relationship for dog owners but not for non-dog-owners.

### **Neighbourhood greenspace is related to physical activity**

Epidemiologists have long been aware that social and environmental factors can contribute to the incidence of many human diseases. Predictably, as the single activity occupying most people's waking time is work, pressures, strains, and stresses within the workplace have been identified as being a potentially important health factor.
