No. You can restore to any point before the time covered by that log backup, or any time afterwards, but not any time covered by the log backup as the backup contains data extents and there is no way for the restore to know when to restore some or all of those data extents or not.

A SQL Server DBA myth a day: (28/30) BULK - Paul S. Randal

By default, SQL Server adopts a pessimistic approach to concurrency, acquiring locks in order to avoid read phenomena such as dirty reads, non-repeatable reads and phantom reads, depending on the required ANSI isolation level. As a result, readers block writers and writers block readers. However, the ANSI SQL definitions of each of the transaction isolation levels specify only which of the ...
